## Education

### Durban University of Technology

Advanced Diploma in ICT Applications Development, Grade: Cum Laude (85% Aggregate)  
Diploma in ICT Applications Development, Grade: Cum Laude (78% Aggregate)

Durban, KZN  
Jan 2022 - Nov 2022  
Jan 2019 – Nov 2021

## Work Experience

### Nologo Studios

#### Junior developer

Jan 2023 - Current

- Developed and maintained web-based applications written in traditional ASP.NET and ASP.NET Core, showcasing versatility in web development technologies.
- Demonstrated expertise in database management and programming by proficiently implementing DML and TCL queries on production databases for multiple clients, including a publicly traded company.
- Resolved bugs preventing page display for a web-based application, ensuring smooth website operation and optimal user experience.
- Created SQL scripts to handle data for various clients, demonstrating proficiency in data management and programming skills.
- Developed and supported application systems, adhering to established standards and processes, resulting in efficient and effective system performance.
- Collaborated with colleagues to troubleshoot and solve problems, fostering teamwork and communication.
- Experience in, including utilizing Azure DevOps for continuous integration and deployment (CI/CD) processes managing code repositories, creating tasks, and deploying applications to staging environments for QA testing.
- Conducted comprehensive QA testing, including functional, regression, and integration testing, to ensure the quality and reliability of the software product.

### Level Up Medical

#### Full stack software developer

Jan 2022-March 2022

- Selected as one of 300 participants in the entire course for the internship program based on leadership potential, academic success, and software projects.
- Built an electronic health record (EHR) system using ASP.Net Core Blazor.
- Implemented Transact SQL queries for the EHR CRUD operations using Dapper ORM.
- Implemented SyncFusion component library for the user interface.
- Collaborated with stakeholders in giving input on design decisions and business operations.
- Utilized software: C#; Blazor; SQL; Syncfusion; HTML/CSS; Dapper ORM.
- Reference: CEO- Kamlesh Maharaj; 083 777 4713
